

Clearing the Interconnection Queue

Simone Adeyemi (S034)

2027-04-26 | 10:00-11:00 America/New_York | Spinnaker Room

Session scope

Cluster studies and the reforms shortening wait times. CE credits: 1.0 PDH

Learning objectives

1. Participants will distinguish individual and cluster-study assumptions.
2. Participants will trace a fictional application through study and revision stages.
3. Participants will identify missing evidence that would delay a study decision.

Teaching plan

The speaker introduces the source session topic and a fictional case. Participants identify the decision to examine, review the supplied evidence, then discuss how different assumptions change their conclusions.

Case discussion

The group works through a case about clearing the interconnection queue. Each team records the information it trusts, the information still missing, and the reason for its proposed next question. The speaker compares the teams' conclusions and ties them back to the session scope.

Outline status

This synthetic demo fixture represents the first outline submission. Its review state appears in the conference workspace. The final presentation deck is due April 9, 2027 and has not been uploaded.
