

Capacity Markets Explained for Operators

Nathaniel Crowe (S049)

2027-04-26 | 10:00-11:00 America/New_York | Compass Room

Session scope

How capacity obligations affect real-time operations. CE credits: 1.0 PDH

Learning objectives

1. Participants will distinguish a capacity obligation from an energy schedule.
2. Participants will compare two fictional cases with different availability assumptions.
3. Participants will identify the obligation details an operator would need to clarify.

Teaching plan

The speaker introduces the source session topic and a fictional case. Participants identify the decision to examine, review the supplied evidence, then discuss how different assumptions change their conclusions.

Case discussion

The group works through a case about capacity markets explained for operators. Each team records the information it trusts, the information still missing, and the reason for its proposed next question. The speaker compares the teams' conclusions and ties them back to the session scope.

Outline status

This synthetic demo fixture represents the first outline submission. Its review state appears in the conference workspace. The final presentation deck is due April 9, 2027 and has not been uploaded.
